If you are planning for a career in forensic identification work, you should hold membership in the Texas Division of the International Association for Identification (TDIAI). In addition to ensuring your professional advancement and keeping you up to date with the latest technology and innovations, TDIAI is a long established organization that facilitates productive meeting and consulting with others in your field, both locally and worldwide.

The TDIAI is affiliated with the International Association for Identification, which was organized in 1915 and has over 4,000 members in the United States, its possessions, and many other countries.

Two of the objectives of TDIAI, as outlined in the constitution, are: "To keep its members apprised of the latest techniques and discoveries in scientific investigation" and "To employ the collective knowledge of the profession to advance the scientific techniques of identification and investigation."

As a member, you will also have the privilege of attending and participating in annual conferences where you will meet and become acquainted with leading experts in all phases of crime detection and identification.
